

# CNC Milling High-Precision CNC POM/ PA Machining Services With Phosphating Surface

## Specifications :

Price	Contact us
Brand Name	ETCN
Place of Origin	Shanghai
Min.Order Quantity	100
Payment Terms	T/T,L/C,D/P
Supply Ability	3 days
Delivery Detail	3days--7days
Packaging Details	Wooden case or wooden pellets depended on clients' require

## Detail Introduction :

CNC Milling Capabilities

CNC Milling Material and Finishes

## CNC Milling Capabilities

The comprehensive processing ability is strong. After the workpiece is clamped at a time, more processing contents can be completed. The processing accuracy is high. The efficiency of batch workpieces with medium processing difficulty is 5-10 times that of ordinary equipment, especially it can complete much ordinary Processing that cannot be completed by the equipment is more suitable for single-piece processing with complex shapes and high precision requirements or for small and medium batches of multiple varieties. It concentrates the functions of milling, boring, drilling, tapping, and cutting threads on one device so that it has a variety of technological means. To provide you with a high standard of CNC Machining Services.

## CNC Milling Material and Finishes

Machinery

5

Material

Alloys Steel  
Aluminum Alloy  
Copper  
Brass  
Deburring  
Tapping  
Threading  
Grinding

Bronze Alloys  
Stainless Steel  
Carbon Steel  
POM/PA  
Drilling  
Milling  
Boring  
Knurling

Features

Maximum Dimensions

800mm\*500mm\*550mm

Milling Tolerance	±0.005mm	
	CMM	Projector
Inspection Capabilities	Imaging Measuring Instrument	Hardness
	Metallographic Microscope	Non-destructive Equipment
	Automatic Thread Inspection Equipment	
	Zinc Plated	Sand Blasted
Surface Finished	Nickel Plated	Blackening
	TD Coating	Phosphating
	Dacromet	Zinc-Nickel Plating
	UNF	UNC
	NPT	SAE
Thread	Metric	BSPP
	BSPT	JIS
	DIN	G
	R	ZG
Certification	ISO9001-2008	ISO/TS16949

### Advantage of CNC Milling

CNC milling processing is suitable for precision and complex parts processing, periodically repeated production parts processing, multi-station, multi-process concentrated part processing. The main processing objects are box parts, complex curved parts, special-shaped parts and discs, and plate parts.
